

## **Right way, Wrong way**

### **Interview**

For this activity, you will be creating two interview scripts with a partner.

- The first script will consist of 7 interview questions and answers that follow the interview tips discussed in class. This interview should be one that is positive and would end with the employer hiring the interviewee.
- The second script will consist of 7 interview questions and answers that do not follow the interview tips discussed in class. This interview should be one that is negative and would end with the employer not hiring the interviewee.

All answers should remain school appropriate and you will be sharing your interview scripts with the rest of the class. Here is the first question for the interview to help get you started:

1. What is your previous work background?

You will need to write and answer six more questions similar to the above question for both the right way and the wrong way.
